

THERMALSUPPORT

Products we support in both our Repair Depot and in the field

*Thermal Support has chosen to limit the products we service to those where we feel **we can equal or exceed the original manufacturer's (OEM) capability**. Realizing that is no small task, we special in "non- current" products where (1) our service expertise and (2) our ability to obtain parts (no longer generally available), enable us to excel in areas where the OEM's own support capabilities are severely challenged. This has worked for us and in addition to our Customers and Peers, both PerkinElmer and Shimadzu often recommend Thermal Support as the place to go for expert service on non-current PerkinElmer and Shimadzu products.*

Instrument Type	Model Number
PE DSC & DTA Analyzers	DTA7 DSC4, DSC7 Pyris1DSC, Diamond DSC DSC6 Series (DSC6, Pyris6DSC, Jade DSC, DSC4000)
